

```
In [26]: import pandas as pd
```

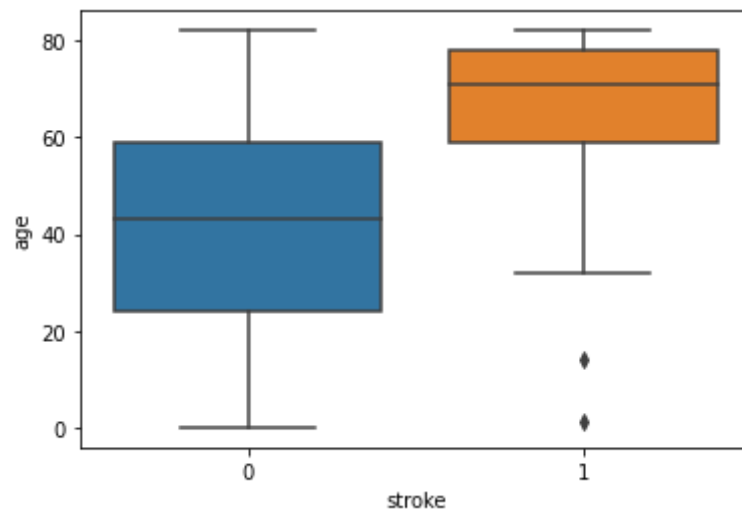

```
In [27]: from google.colab import drive
```

```
In [28]: drive.mount('/content/gdrive/', force_remount=True)
```

Mounted at /content/gdrive/

```
In [31]: df = pd.read_csv("/content/gdrive/MyDrive/stroke/healthcare.csv")
```

```
In [34]: sns.boxplot(x='stroke', y='age', data=df);
```

Based on the data, the boxplot indicates that people above the age of 60 have higher chances of having strokes.
